# **CLUB LEAGUE**

**(box league)**

- **Easy to setup & saves a lot of time**
- **Run by the players – players fill out the results through their profile**
- **Super fun and social**
- **Build a community around a club/organization**
- **Attract new customers**

Club League (also known as a Box League) is a competitive and social format designed to increase the players activity. It is very social and typically played on a club evening where the clubs play their matches during a certain period (typically one month). It is also a great way for players to meet new players of their playing level.

New players start at the lowest pool of each club league and after each playing round, the winners of pool are promoted to the upper group and the losers are demoted to the lower group.

### Key Features:

- Customized possibilities so players do not meet the same players every round
- The admin can choose the number of players to be promoted demoted from each group
- Chat with other players can agree the time and date for playing
- Each match will influence the player's Club Skill Rating
- Easy creation of upcoming rounds
- Can be connected to a club Ranking
- Complete control by the admin in changing results, adjust standings when adding new players

### How does it work:

1. The admin creates the club league and sets up the parameters (very easy and will take only few minutes)
2. Advertising the Club League - print out automatically generated posters, share buttons for social media, embed to your website
3. The players are joining – it is free of charge, even the help desk chat
4. Once the round starts nobody can join that round
5. Players arrange the playing time in the Rankedin Chat or they play on a fixed date set by the admin.
6. After the game, one player/team will add the result and the other needs to confirm it so the result becomes official.
